

**SUBMISSION TO IPART REVIEW**  
**SOLAR FEED-IN TARIFFS 2017/18**

**Friday, 19 May 2017**

2:29:49 PM

I wish to make a submission to say that I strongly support a fair price for solar. If all houses had solar on their rooftops it would greatly diminish the need for other unacceptable systems, like coal and oil fired generation.

The feed in tariff should increase in line with the wholesale price of electricity. We have solar panels, and a solar hot water system on our roof because we believe the move to sustainable clean energy is urgent.

The damage being caused by our changing climate needs to be addressed as a matter of urgency.

A fair feed in tariff is one way of helping the environment.
