SOLAR FEED-IN TARIFFS 2017/18

Friday, 19 May 2017

6:16:04 PM

i fully support a increase in solar price the greedy power companies want it all. just think when it comes time to replace our solar systems would you invest that amount of money for that return. i think 14c to 16c is fair but should rise everytime power charges rise also we should only pay 50% of supply charge or we should get paid for supply to them
