

SUBMISSION TO IPART REVIEW
SOLAR FEED-IN TARIFFS 2017/18

Friday, 12 May 2017

7:40:41 AM

From my 27 April 2017 Origin Energy electricity bill my total usage was 716 kWh.

I exported 2,087 kWh to the grid but still had to pay \$105.21.

It doesn't seem right that I export nearly three times what I use and still get a bill.

My feed in credit is 10 cents per kWh.

My usage charge is 24.2 cents per kWh

Supply charge is 136 cents per day.

Regards

William Phillips
