SOLAR FEED-IN TARIFFS 2017/18

Wednesday, 10 May 2017

7:45:27 AM

It is a great idea to double the feed in tariff for roof top solar. I feel this will encourage further investment in solar and make a difference towards climate change. This however should only be seen as a starting point Australia should be leading the world in solar and alternate energy rather than relying on polluting coal fired power.
