SOLAR FEED-IN TARIFFS 2017/18

Friday, 19 May 2017

8:27:53 PM

First we were encouraged to get solar which dropped from 60c to 20 by the time it was installed. Now all I get is 6c. What is the purpose of my investment been? To benefit the electricity company. I feel ripped off severely and like the price increased and give back a fair price.
