SOLAR FEED-IN TARIFFS 2017/18

Friday, 12 May 2017
5:27:07 AM

It's only fair to have fair prices for solar. The tariff needs to increase in line with the whole price of electricity generation. Pricing should include the value as a benefit to a cleaner environment. As a solar energy collector I am conscious to use electricity wisely and efficiently. Solar is the cleanest and safest way forward. Lets make it possible
