

SUBMISSION TO IPART REVIEW
SOLAR FEED-IN TARIFFS 2017/18

Sunday, 21 May 2017

7:21:44 PM

The feed-in tariff should be a fair market value for the electricity we provide to electricity companies, given that is then sold off to consumers with a 25% surcharge. Solar owners like myself signed on years ago with the intention of creating a pool of renewable energy for ourselves and our neighbours. It's time electricity providers get on board with this program.
