Submission: If this covers rural properties we barely have any rain water to feed our livestock let alone irrigate our land.

We are not on town water: if you raise our rates then put us on town water in Kulnura!

How dare you charge us for the very little rain we get. We haven't enough to survive. If you charge us more we will barely make ends meet.

Our property was 50 acres of grass two years ago when we bought it. Now it is dead due to the drought. We are trucking water in just for the toilet and showering.

Please do not increase the rates for primary producers.

I beg you.
