Submission: Very dissapointed that the free trips after 8 will be removed . This was a key advertising feature used to get people to switch from paper tickets to opal cards when opal was first launched. Now paper tickets are gone you want to remove the key items you have. It's just not right .... For the way you have it set up Monday to Sunday for a week( on paper tickets you could start your week when you want) if you work mon -Friday your more expensive trips will be at the end of the week when you are not heading to work. So people taking higher fares on these days make sense . If my fares go up because of increased fares to be that of what registration of a vehicle costs over a year I will be purchasing a car or bike as I don't work in the city so have access to free parking and the 40-65 weekly fee will be paying for my fuel so this will negate what public transport is which is taking vechicals off the road. And many of the staff who use public transport at my workplace all think the same ... For me I think I will be saving money as I travel off peak most trips but I do use it 7 days so will have to wait and see .... An option as to choose what day of the week your weekly travel pass trips start like the old paper tickets would also be great for tourists as well or for locals if free trips are available still as this is one of the reasons people currently scam the system because they miss out on free trips if only use for work and have 2 days off early in the week and work weekends ....
