Submission: I wish to object to confidential submissions being made because of incompetence in Transport for NSW and the NSW treasury is hidden from public scrutiny.

1. Transport for NSW is overseeing Railway construction that is creating new maintenance work for Sydney Trains to expedience a contractor alliance - ie Building poorly designed concrete retaining walls on the ETTT which are now covered in graffiti which hadn't occurred before the design and construct alliance commenced. Sydney Trains will be passed the expense of forever continually removing the graffiti.

2. NSW treasury for entering into a contract where construction work requires future maintenance work that would not have occurred had whole of life design concept been adopted as required by the government.

3. I am sure that much of the future increase in maintenance is due this type of incompetence and should not be hidden from the NSW public or result in increased fares.
