Submission: I wish to protest the proposed increase in seniors concessional fares. This will place a burden on self funded retirees already under pressure from falling super valuations and historically low interest rates.

It can only lead to increased road and parking congestion.

As I mostly travel only a few stops it will only encourage private car use as the proposed increase will make bus travel less attractive .

Often we use the bus when we baby sit our grandchildren ,however the proposed increases will make using our car a better option.
