Submission: I strongly oppose the proposed changes to the Seniors Opal Card. I am a self funded retiree and this card is a treasure for me. It allows me to use public transport which Gets me out of the house and then I usually spend money on such things as the movies, llunch, afternoon and morning teas and other expenditure which is good for businesses. Less people out and about will certainly affect businesses. Keeping me and others like me isolated in our homes will affect our health which will roll on to the costs of health provision. Having worked all my life and paid my taxes this "gift" from the government is much appreciated. I have no objection to raising the cost to \$3. Every person I know who has this card will certainly protest strongly. If all these people march in protest it will certainly not benefit any government who tries to implement major changes to the Seniors Opal Card.
