Submission: I am a resident of cooranbong and I am sick of developers requesting to put in sewerage plants when they know the community is not happy about it.

I am against this proposal not only because of the negative health effects it will have on the community but because this development will devalue our houses and therefore our investments.

This sort of facility should not be built in the near vicinity to any populated area and as a governing body, you should know that.

This facility proposal is offensive.
