Submission: RE: September 1st changes to My Multi ticket inclusions (Sorry but I couldn't see the submission in the list and are responding to signs posted at Ferry wharfs).

I live at meadowbank which has a train station and Ferry wharf. I currently pay \$52 to travel within the my multi zone 2 by Ferry, Train or bus. From 1st september the same travel in the same area with the same lines will require mymulti 3 at a cost of \$61. That's a \$9 increase on what I currently spend (a 17% increase). Alternatively we have the choice to stick to the current my multi 2 and lose all ferry service. This has currently been advertised with the statement that 'Fares have not been changed' but clearly they have. We also can't see how making this change will increase what they have quoted as been low level of usage of the ferries as it will undoubtedly lead to many people stopping using it at all. I cannot find any information on your site of how this large increase has been justified, only that last year the my multi fare increases were capped around 2.4%.
