Submission: I'm a mother of a toddler staying home with my son and also working part time 2 days/week. Going to city to work with mybus3 travelten costs me around \$3.70/ride. Now with the opal card only offering free rides after 8x use within a week costs me around \$4.50/ride to go to city to work. Its actually more expensive for me to go to work now, i do not get the benefit of the free rides. Please consider a more correct pricing to the whole situation.

Thank you
