Submission: Your present prices are unbelievably expensive.

I own a one bedroom apartment [REDACTED]

Last bill is for \$185.83. The amount for actual water is \$25.64. This a quarterly bill.

The amount for Sewerage service is \$152.29. My building comprises 182 apartments.

You are price gouging in the name of building infrastructure. This appalling situation has not been caused by individuals but by Political neglect over many years and now you are catching up by costing this necessity at unbelievable rates to catch up to pay for years of neglect. How much does your CEO earn that's where most of the costs are with heavy administrative costs and salaries. Cut back these costs and you may be able to drop our prices. Your bills are ridiculous they should not be permitted to continue.
