Subject: Opal for Seniors

To whom it may concern,

I wish to comment on the Opal card for Seniors.

At the present cost , Seniors can easily access public transport for recreational needs, including sporting activities to maintain our fitness levels.

Some of us also use public transport to visit elderly relatives in hospital or to help them with their daily activities.

If this cost is significantly increased, Seniors may find these activities curtailed , which is a loss to society.

Seniors need to be able to maintain their health, and to help others .
