Submission: If public transport costs are dramatically increased it will have the following disadvantageous effects with further disadvantageous flow-on effects. I believe similar issues will also affect many others less able to articulate their position:

I will be much less likely to participate in regular voluntary work.

I will less often visit friends and family. and/or need to rely on them for transport, which decreases my independence.

I will much less often visit local parks, art galleries and libraries.

I will not be able to afford to travel to the fresh food markets regularly to shop

I will not be able to travel as often for medical and dental appointments so will attend them less often.
