Submission: I do not agree with the proposed increase, once one has achieved ? A certain amount of years it does seem fair to allow some benefits for all those years of taxes.

Luckily living in Balmain, a very cosy suburb, I do use public transport a lot & think the service is great. At the current rate of \$2.50 per day fine , I can feel free to enjoy the city, environs , in short to enjoy the freedom of retirement. I am a widow, with only my own super to fall back on, the prospect of of a fee increase + a dreaded gift increase is daunting.

It does seem petty, I can suggest numerous other taxes to be not just increased but implemented, major companies etc.
