

Good morning Sir/Madame

I would like to express my view about the proposed change of Transport- future pricing.

Pls do not cancel the 8 trips benefits to community

I am working as Public servant.

Our pay rise only 2.5% per year.

Net received after tax is not too much.

If the price increase again, our net pay rise could not cover the increase of public transport price.

Also other consumer products price increase. Even not increase price but reduce quantity.

Including the housing loan payment, our real disposal income is less and less when compare last year.

Pls consider the burden of public and not cancel the eight trips benefits.

Many thanks
