

I live in an apartment block which has one meter. It is unfair that the water usage is calculated by unit entitlement. I do not use the water that I pay for. It would be fair if IPART calculates the water in equal shares between all units in the Strata Scheme. My last water usage bill was \$258.00 which is absurd. If the water keeps increasing in price and I have to pay on unit entitlement I will not be able to live in my apartment which I worked so hard to get. I object paying for other people's water and I ask IPART to change the calculation of water usage to be shared equally by all owners NOT make owners pay more just because they have higher unit entitlements than others.
