Submission: I strongly disagree the proposal in the draft report.

I don't know how many of the people involved in drafting the report or officers in the state government are commuting by public transportation everyday, but my expense on everyday commute to work has increased when switching from paper tickets to opal card. I used to buy monthly or quarterly tickets but they are no longer available. Now if the cost to take the public transportation is going to increase again, I really don't know if the government is still intending to encourage public transportation?
