Submission: * Current Opal system of first 8 trips being charged & trips rest of the week are free is being rorted

* I know many people who make many short trips (eg on a bus) on the Monday - costing ~\$2 each

* They will wait for an hour & then make another short trip

* This way - they get to 8 trips cheaply (~\$16)

* And the rest of the week is free and they travel long distances (cost \$10/trip for free)

* Suggestion: if you want to charge only for 8 trips - charge them for the 8 most expensive trips for that week & make the remainder (lower-fare) trips free

* Otherwise, the rorts will continue and unfairly put the burden on the people doing the right thing
