Submission: I am absolutely against increasing the pension fare from \$2.50 to \$3.60. It was decades before the last increase and the pension is dependent on being able to at least catch a bus to go shopping. \$3.60 would cripple my ability to get out of the house whenever I needed to - attend doctors appointments, shop, buy scripts and so on.

This is just greed gone mad and considering how our public transport system lacks so much, any increase is just not justified.

I hope my words will make an impact, as will others. Improve the efficiency of the public transport system, but leave us commuters out of it.
