Submission: I feel very strongly that the fares for public transport for the Senior's Opal card should not be raised from \$2.50 to the proposed \$9. Such an increase is unjustified and will have a detrimental effect on our senior citizens - who have worked all their lives & paid their taxes. The current fares provide the incentive for seniors to get out of their homes and travel in the city - thereby contributing to the economy through their purchases while travelling. I would definitely not support an increase in the seniors fare at this time
