Submission: If the cost of Seniors Opal card is increased significantly there will be detrimental effects on our community. Most of the volunteer work force in this state are seniors, as I am. An increase will affect my ability to continue this work. The emotional, mental and physical well being that people enjoy by participation in society at large that cheap travel makes possible will be lost to many people. It seems anyone considering a hefty increase has no idea how precious this cheap transport is to elderly people. Its loss will surely place even more strain on our health system. I believe the Government will be shocked at the backlash from senior voters if this step is taken. Please don't do it.
