Submission: As a self funded retiree I manage on a frugal amount and use public transport rather than clogging up the roads with my car.

I use it to visit friends in the country, family on the other side of town, going to the shops, to use the cultural facilities in the city. If the amount goes up I will not use public transport to the same extent, and will help the traffic congestion and pollution by car use.

Shocked by the suggestion and have not heard about it before today,
