Submission: "These proposed changes are grossly unfair and could put public transport out of the reach of many people. As well as causing financial hardship, it will make public transport more expensive & is likely to result in more motor cars on the road".

I totally believe in the above statement

It is not environmentally sound, would create more Health Issues in the Elderly.

The Health Benefits of people in getting out, walking, using public transport will be lost once people go by car more often, when they see these trips is taking a sizable proportion of their weekly allowance for living & if they don't have a car, they will severely cut down on their outings, Outings where they most likely spend money...

Think -a couple \$9 each = \$18.00 for one day, 2 days 36.00 from their weekly living allowance

I am against the changes, it is such a good positive thing that the Government does for thei Constituents, don't take it away. ■
