Submission: Currently I pay \$43.92 a week travelling by train to work Monday - Friday, off peak in the morning and with the Friday free after the 8 trips (Mon - Thurs).
Now with your proposed plans I will be paying \$10.98 extra a week which is \$570.96 extra a year! That is assuming you don't have any price increases, and that is absolutely ridiculous and unacceptable.

I will pay \$2854.80 a year just to get to and from work! That is ludicrous, and with your greed the prices are going to increase making that even more!

I don't see how any Monday - Friday worker who travels by train only can possibly benefit from your new plans, when you are getting rid of any benefits and increasing the price. You either keep the travel free after 8 trips or you drastically reduce your prices!

Monthly paper tickets were much more cost beneficial and now that you are only issuing one time opal cards for everyone and not printing paper tickets every day you are saving money so why do you keep increasing the prices?!

This is money scamming greed at its finest and you need to be stopped.
