Submission: Considering the flooding that has occurred in Cooranbong recently, it makes no sense to build a sewerage treatment plant in the designated area - it is right next to Avondale Springs water catchment.

Have any of the planners gone and looked at the proposed area this last week? It is a disgusting mess!

Have any of the planners considered the impact on the housing values in the immediate area? (Probably not!)

The people of Cooranbong do not want this Sewerage Treatment Plant in their area!

Thank you for considering my submission.
