Submission: Self-funded retirees try and look after themselves as much as possible. Self-funded retirees are having their incomes seriously reduced by economic affairs such as really low interest rates. And here you come along and increase public travel by nearly three hundred percent. Shame on you. Many people will have to cut down on travel and stay at home more. This does not create a healthy society. LESS people will travel on public transport. Older citizens are being victimized. The NSW Minister for Roads fairly recently was reported in the press to suggest people over seventy should seriously consider not driving. It seems like the powers that be want older citizens to stay at home, shut-up and die quietly. No way. I am 77 and very fit and healthy. I am going to make my voice heard.

If this incredibly high increase goes ahead I will take action in the only way I can - at the ballot box. My friends feel the same. Many people will not vote for Mike (I don't care) Baird. Or the Liberal Party.
