Submission: I am completely opposed to the existence of a sewerage water treatment plant on this site. It is unsuitable for this type of plant to be situated so close to residences, a large school, a tertiary institution, childcare centres, a retirement village, a shopping village and churches! The negative economic impact on current homeowners in the area is, in my opinion, secondary only to the health concerns this could potentially present for all those in the immediate vicinity. I live in close vicinity of the proposed site, and I don't wish for my young family to be exposed to any economical, physical or environmental side effects from this plant. I implore you to deny this application, and keep Cooranbong the clean, peaceful, community-minded, environmentally conscious village that it currently is.
