Submission: please keep the Seniors Gold Opal Card as it is - as I understand, seniors mostly use public transport out of peak hours - when trains and buses are mostly empty - so are no net cost to the organisation

seniors who have paid their taxes all their lives deserve a fair go - many other countries provide free or very cheap seniors fares - which encourage healthy activity - getting out of the house

if discount public transport is taken away from seniors, I believe they would to stay at home and deteriorate physically, which would result in much higher costs to public health systems and hospitals.

A fair and equitable society in the richest median wealth country in the world can afford to provide discounted public transport for seniors - they have worked all their lives and deserve it.

Please keep Seniors Gold Opal Cards as they are !

Thanking you in anticipation,  
David Green
