Submission: Dear Sir,

I note that ferry charges are increasing under Opel that includes the cost for seniors, which I am. Do you really think we are all stupid you raise fares, yet your staff activities are reduced due to the use of this card, the cost of fuel is at its lowest for years. The idea is to get the public using public transport and keeping vehicles off the road, are you sure this is the way to do it? I really find it very hard to believe that you would approach an increase in this way, liberal popularity is on a high in this state, and I respect that but the advice you are listening to is wrong and a goal for the opposition.
