Submission: To whom it may concern,

I strongly believe if Senior Australians have to pay more to travel it could negatively affect their ability to see their family, to see their kids, grandkids and friends. Whoever works part-time, may be forced to resign because the travel has become too expensive. Seniors with cars are discouraged these days to drive due to age related issues. They'll all stop going out. Pensioners will face the same problem, because by increasing the fares by 44% ,their income is nearly on the breadline. What happened to CPI increases to goods and services? To cancel free rides after 8 trips it's also a bad idea, because free rides encourages us to use travel more but cancel it would only discourage us. Are we going to be a nation to encourage only internet uses to food shop online and never meet other people.

Remember the seniors are the examples of what young people can respect and honour their service to this wonderful country. We are all going to get old, take care of yourself. Who is going to win???? Government will lose. Please leave gold OPAL without any changes.

Kind Regards,
David Miro.
