Submission: I strongly believe if Senior Australians have to pay more to travel it could negatively affect their ability to see their family, friends and go out to clubs, beaches & etc. Many seniors with cars are discouraged these days to drive due to age related issues. Pensioners will face the same problem, because by increasing the fares by 44% ,their income is nearly on the breadline. What happened to CPI increases to goods and services?

Free rides after 8 trips encourage us to use travel more but cancel it would only discourage us. what left for us: stay at home, watch TV never meet other people.

As result it will be a lot depressions & illnesses. who is going to win?

We are all going to get old, take care of our self.

Please don't change anything, leave it leave gold OPAL as it's.

Kind Regards,

Efim Miron.
