Submission: Would have fully integrated Pricing with a surcharge for Ferries

Have a 40% discount for off peak travel, current train rules and keep the current discounts card rates. Eg 50% off for child

Eg

Zone 1 - 4k - \$2

Zone 2 - 4-10k - \$3

Zone 3 - 10-20k - \$4

Zone 4 - 20-35 - \$5

Zone 5 - 35-65k - \$6

Zone 6 - 65k+ - \$8

Ferry Surcharge - \$2

So for a 15k fare which includes a ferry trip it be $\$4 + \$2 = \$6$

If It was off eak it be \$3.60
