Submission: re total assets of person being managed, which the NSW Trustee & Guardian fee is based on.

I cannot understand why any funds not related to the court settlement are included in the individuals total assets ?

For example I am the guardian for my son [REDACTED], he is able to work part time and earns about \$29,000.00 per year, which he uses for daily living expenses etc.

Please consider / explain why this income is included in his assets that I manage when calculating fees?

I suggest that any additional income that my son earns should NOT be included in his assets when calculating fees.

Thank You.
