Date of submission: Friday, 5 February 2016

Submission: We only found out today by sheer accident that you are going to put up aged pensioners concession fares from \$2.50 to \$9, how on earth can you possibly even think of doing this. There also been no noticeable publicity about this in the media, I know this as I read the papers every day & listen to the new & if it has been announced it has been done very quietly. All my friends are also aged pensioners & I can assure that not one of them know anything of this proposal. We are already thinking our choice of parties & this will definitely be another reason to change even though up until the last year we had been quite happy with the Liberals. Hoping reason prevails. You probably won't get many submissions because as I said no one knows of this well not many anyway.
