Submission: Please consider the self funded retirees. If you increase your fares and seniors find it cheaper to drive as a couple you will far more seniors on the road. Only last night on the news I heard a senior police representative asking if people over the age of 70 think about being on the roads as drivers. I have paid taxes all my life and we as a couple have been very careful with our money. My choice we have not had any overseas holidays. This means we will be self funded retirees for a long time.

We have made this decision, so we should not be penalised for being careful with our money. Please do not differentiate between self funded retirees and pensioners.

Thank you for the opportunity to comment.

Jenny
