Submission: Removing the \$2.50 per day travel rate from self funded retirees would be counter productive. It will result in more self funded retirees investigating ways they can minimise income so that they qualify for the aged pension. Self funded retirees save the government millions of dollars per year. Don't take away this small benefit from us. Keep in mind the the contribution self funded retirees have made in the past and continue to make through volunteering. The \$2.50 travel rate makes volunteering a more attractive prospect. Excluding this group from accessing the \$2.50 travel rate would be a huge mistake.
