Submission: I am appalled at the State government's plan to remove the current Seniors Gold Opal card from self funded retirees. They deserve better than that.

And it won't help the economy either. The obvious consequences of this is that in many cases they will travel less and become isolated from friends, community and activities. This inactivity then leads to health issues, both physical and emotional, sad for the individual and a higher cost to the Government.

Not a sensible idea at all.
