Submission: Why pick on pensioner/concession recipients to be those slugged an enormous increase - when for most of us pension payments have just been cut. I think it might actually be better to cut the pensioner/concession daily capped fare to \$2.-

Increase buses and trains and ferries - build better and more bus/rail services across NSW rural and urban centres. Look after the elderly - look after those needing welfare. Make compulsory the use of public transport by all tiers of parliamentary representatives whenever on official business - local, state and federal! Deduct from salary any elected person who uses private vehicles - their own or that of friends/others!

It's time to look after ALL citizens - to cut out "privilege" for its wasteful tendencies!
