Submission: Any change to the Gold Opal Card for us senior people would be totally stupid. You will end up having thousands and thousands more people in the 60, 70, 80+ age group deciding to drive their cars rather than catch public transport.

One minute in the media there are complaints about older people driving and now you are forcing them back on the road.

Loads of my friends are in their 70's and we all catch public transport when we possibly can, rather than driving.

Wake up!
