Submission: I support the retention of \$2.50 for ALL Gold OPAL card holders. Glebe being an inner city suburb, means that people only make short trips, therefore making any price grossly expensive and unfair. The Glebe Community has a large number of people who are residents of Public Housing and also on low incomes. This proposal will make for more people to resort to using the car as a means of transport. Philosophically, there is a cultural shift of people living in the inner city wanting to use public transport rather than private cars. I believe the NSW Government should support this environmental initiative.
