

Dear Sir, Dear Madam,

i was not able to lodge my submission on your website because there are only three options on the top (Review/Document) and none of these options represents Gosford Council demand for water & sewage price rise in next 4 years.

I must oppose the Gosford Council proposed rise of water and sewage charges/prices in next four years, reaching up to 140 percent (please view attached docs).

I fully agree with Mr. Rendall Wagner of Point Clare that this is an UNJUSTIFIED RATE RISE. Revenue raised would far exceed costs of stated infrastructure projects. The magnitude of a rise will be a shock, and there was insufficient information about the capacity of people to pay. Gosford Council should research that capacity of their own local people, but obviously Gosford Council don't care about people, about Gosford shire residents.

Many people/families still struggle - low income wages and high mortgage repayments, Council rates, Strata levies, electricity (60% up in last 5 years), water, gas, food, transport to work, etc.

Please don't approve Gosford Council water and sewage price rise as demanded by Gosford Council..

Thank you. Sincerely,  
Jerry Suchanek (Woy Woy, NSW resident).
