Submission: We think that the price increase is exhorbitant. We are trying to manage without the government pension and the travel Opal for \$2.50 is a big help in keeping our expenses in check. Also the more the seniors travel the better it is for their health and well being as it keeps them happy and occupied. Also they spend money when they go out and hence this helps the economy. PLEASE consider before you put the price up to \$9 as it is being proposed. Appreciate your listening to us. Thank you.
