Submission: Hello Members of Tribunal ,

Below is my submission regarding Opal city rail fare structure. There is fare slab 20km. After 20km Fare slab goes to next level. For Example From North Sydney to Flemington is 20.63Km. Just for the sake of .63km I have been charged next slab. I feel that it is unfair. The rule should if the next station is 21+kms then next slab of fare should apply. The passanger should be given grace for the fraction of the KM.

Regards
