Submission: I write in support of this application. The development has been approved, the lots sold and houses will be built. The proposed grey water system is an excellent design for a site so isolated from existing infrastructure. There will no doubt be many objections from existing residents. This needs to be balanced against the benefits this system will bring to what will be the vast majority of Catherine Hill Bay residents, once this project is complete.

With no sewage going in to the Ocean like most suburbs, reduced fresh water usage as toilets and gardens are on grey water, this type of system should be encouraged on more estates.
