Submission: Please stop increasing costs for those who use public transport daily - people should be rewarded for catching public transport, not punished! If these charges rise we will see a marked increase in the amount of people who drive to work, clogging an already congested Sydney roads with many more solo drivers. For you to so fancifully state that these proposed changes create a 'fairer' system is a joke, please REDUCE weekly payments for people who use it, for the better of traffic everywhere!!
